To Thomas Zimmermann

Dear Mr Zimmermann

Thank you for the message to our website.

Omer Roucoux, alas, died some years ago. I have spoken to his widow, so there is no objection to your using his research. It sounds interesting...let me know how you get on.

With best wishes

John Buckledee,
chairman, Dunstable and District Local History Society.

Your Message

Good evening,

I have a somehow strange problem where you maybe could help.

I am part of an open source project for geocachers, providing an app called GC Wizard to support solving puzzles. One topic is encoding and decoding e.g. Telegraph codes.

Currently I work on a feature to encode and decode text messages according to the Murray Shutter Telegraph. Hence I am looking for codetables for this telegraph. During my researches in the internet I found your website with an article written by Omer Roucoux about the Dunstable Signalling Station where he showed such a table.

I would appreciate if you could help me to get in contact with Mr.

Roucoux to get his allowance to
use/incorporate this table within our
app.

Kind regards
Thomas Zimmermann
