Betreff: Norwegian optical telegraph invented by Ole Ohlsen, 1808

Mr Zimmermann,
Referring to your email with request for codebook of Norwegian optical telegraph system. I include a scanned version of a facsimile of original codebook from 1808. This publication also gives a translation/explanation in modern Norwegian of this system, unfortunately not in English. You must organize a translation yourself. I hope this will be to your satisfaction.

Yours sincerely

Anne Solberg
